

H-PreC One-Step® EXCLUSIVE PATENTED PROCESS

**A very high quality deep-drawn composite
Directly integrated surface finish and technical inserts**

OUR MARKETS

Already on the aeronautic, automotive, robotics, medical markets...
H-PreC provides technical or ornamental composite parts for industry.

THE COMPANY

H-PreC creates and develops thermosetting composite parts with its exclusive patented fabrication processes.

H-PreC SAS
Zone Industrielle
4e avenue / 10e rue
06510 Carros, France
20 min. from Nice airport by car.

SURFACE FINISHED COMPOSITES DIRECTLY DURING THE FABRICATION

**Saving time and best quality
with the post-treatment suppression**

The perfect product for seat casing, car or aircraft interior, furniture, body panels...

**A range of surface finishes
for a customizable product**

Leather, fabric, metal sheet from 20µm, aeronautic laminate, car wrap film, decorative film (painting, wood, silk....)

A VERY HIGH QUALITY DEEP-DRAWN COMPOSITE

**A limited tooling
for an accessible composite**

A thermosetting flat or deep-drawn composite for very high quality technical parts.

**The sandwich
composite to
reduce the
weight of your
structures**

A stiff and light composite with its foam core.

**Directly integrated technical inserts
To reduce the assembly time**

PRODUCT AND PROCESS ADVANTAGES OF H-PreC One –Step®

**Innovate to democratize
the industrial composite**

From prototype to large scale production, all products have in common:

- A competitive cost.
- An affordable quick-to manufacture mould without thermal inertia.
- A very high quality.
- A perfect traceability and reproducibility.
- Quick feasibility study and manufacturing.

Maximum size: 1400 x 1400 mm
Depth to 200 mm

THE COMPOSITE CHOICE

**A material that meets your
highest technical needs**

- Light.
- Stiff.
- Resistant.
- Without thermal bridge.
- Little mechanical fatigue.
